## Structural Fabrication Capabilities

Breedt Production Tooling and Design is a full service steel fabricator serving the commercial and Industrial sectors in Western Washington and Alaska. Our goal is simple: offer the highest quality of fabrication, complete projects on time and at a competitive price.

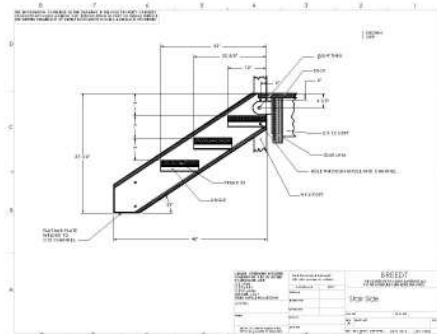

## Architectural Modeling Services

We offer complete design capabilities including 3-D modeling using Solid Works. We are able to run complex modeling simulations easily, allowing us a quick turn-around time for design proposal and quotations. Breedt production works with all types of files and our design engineers can produce shop drawings from Architectural plans with photo-rendering.

## Shop Drawing

## Construction Fabrication

## Industrial Welding

## Outstanding Quality

Breedt is well known throughout Puget Sound for its fabrication of sophisticated tools and fixtures. Our certified welders have over 20 years of experience with fabricated steel structures.

## On Time Delivery

Our structural steel department features state of the art CNC equipment to ensure maximum accuracy and rapid fabrication for many projects.
